

GRUNDOMAT – The new Generation

Service Training

- Target group:** Office- and field service-based service technicians from the global TRACTO-TECHNIK organisation as well as dealers and partners.
- Prerequisites:** We require basic technical knowledge and experience in repairing GRUNDOMAT soil displacement hammers. As the training course also involves practical subjects, we ask that you bring along work clothes and safety shoes.
- Your benefits:** Here you will gain intensive skills and knowledge, which you can use to localise errors on GRUNDOMAT-soil displacement hammer quickly. Through targeted troubleshooting, you will subsequently be able to perform repairs correctly, properly maintain the soil displacement hammer and replace wear parts. In addition, you will be taught valuable, essential tips and tricks for repair work. The knowledge you acquire will enable you to perform repairs faster and to repair more GRUNDOMAT soil displacement hammers in a shorter amount of time. As a result, you will actively contribute to generating a higher sales volume.
- Contents:** GRUNDOMAT product overview
Accessories
Tools
Practical training
Documentation, ordering spare parts with TRACTRON
Annual testing by qualified persons
- Dates:** 17. October 2019
05. March 2020
