

# GRUNDODRILL 18ACS

## Service Training

- Target group:** Office- and field service-based service technicians from the global TRACTO-TECHNIK organisation as well as dealers and partners.
- Prerequisites:** We require that participants have already completed technical training and have experience handling hydraulic and electronic control circuits. As the training course also involves practical subjects, we ask that you bring along work clothes and safety shoes.
- Your benefits:** Here you will gain intensive skills and knowledge, which you can use to localise errors on the GRUNDODRILL 18ACS quickly. Using targeted troubleshooting, you will subsequently be able to perform repairs on HDD rigs in a timely and cost efficient manner. In addition, you will be taught valuable, essential tips and tricks for repair work. The knowledge you acquire will enable you to perform repairs faster. As a result, you will actively contribute to generating a higher sales volume.
- Contents:**
- GRUNDODRILL product overview
  - Machine operation
  - Maintenance and service work according to maintenance plan
  - Functional principle and diagnostics of electronics
  - Functional principle and diagnostics of hydraulic systems
  - Configuration of machine parameters
  - Replacement of wear parts
  - Conversion of drill rod types GRUNDODRILL 18ACS
  - Difference between GRUNDODRILL 18N and 18ACS
  - Operation and maintenance work on the mixing system
  - Testing by qualified persons
  - Ordering spare parts via TRACTRON
- Date:** 11.-13. November 2019
- Location:** **TRACTO-TECHNIK GmbH & Co. KG, Headquarters**  
Paul-Schmidt-Str. 2, 57368 Lennestadt/Germany
